About DENSO

DENSO is a leading supplier of advanced automotive technology, systems and components for major automakers. We are committed to making the world a better place through our world-first products and technologies.

DENSO Philosophy

The "DENSO Philosophy" guides our corporate actions, ensuring that we will continue to be a corporation that is trusted by people around the world.

Our Mission

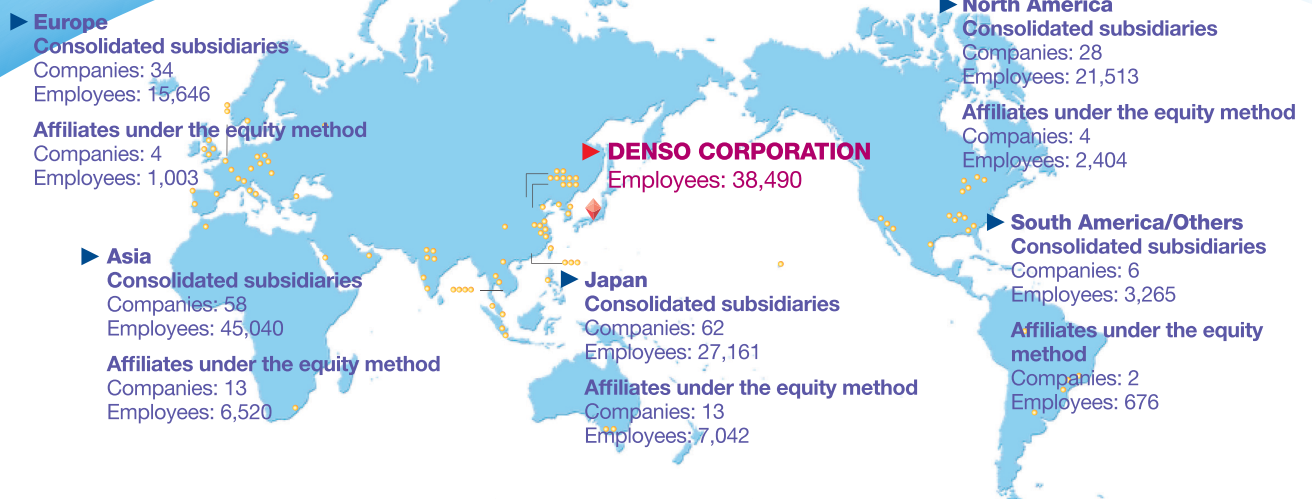

Contributing to a better world by creating value together with a vision for the future

Our Management Principles

- 1 Customer satisfaction through quality products and services
- 2 Global growth through anticipation of change
- 3 Environmental preservation and harmony with society
- 4 Corporate vitality respect for individuality

Our Individual Spirit

- 1 To be creative in thought and steady in action
- 2 To be cooperative and pioneering
- 3 To be trustworthy by improving ourselves

All business locations: 224 companies (38 countries and regions)
Consolidated subsidiaries: 188 (Japan: 62, North America: 28, Europe: 34, Asia: 58, South America/Others: 6)
Affiliates under the equity method: 36 (Japan: 13, North America: 04, Europe: 04, Asia: 13, South America/Others: 2)

About Wiper

The Wiper System & Configuration

How the Wiper Blade wipes the Glass

The job of the wiper blade is not to wipe water off the glass. What it does is to smooth the water on the surface of the glass in order to create "a thin film" that allows light to pass through it without refracting, or bending.

About Replacement

Bend Angle of Rubber

Proper angle can make a uniform thin film of water on the glass surface to keep safe vision. Proper bend angle of rubber is 30 – 50 degree

Proper angle

Too much bend

Too little bend

Bigger play between levers
Rubber deformation
▶ Smear

Rubber hardening
▶ Chattering

Connection → 

Yoke → 

Main reason for improper bend angle

- ▶ Play of claw of yoke
- ▶ Play at the connecting portion

↓

Improper rolling angle

Even new rubber cannot resume original wiping performance if the superstructure is used for a long time

**Example showed is tournament type wiper.

Replacement Signs

These are the four main signs of Wiper Blade deterioration that are visible on the windscreen glass. These symptoms will help you determine when a Wiper Blade needs changing.

Streaking

Symptom: Narrow streaks are left on the windshield.

Cause: Foreign matter has attached itself to the rubber blade, or edge of the blade is worn.

Remedy

First, clean the edge of the blade. If streaks still appear, replace Wiper Blade.

Unwiped Spots

Symptom: Wiper Blade leaves one or more unwiped spots.

Cause: Rubber deformation.

Remedy

Replace Wiper Blade.

Jumping

Symptom: Wiper Blade jumps and makes a lot of noise.

Cause: The Wiper Blade does not move smoothly across the windshield, but vibrates noisily and bounces.

Remedy

First, clean the windshield; then check the angle. If jumping persists, replace the Wiper Blade.

Uneven Blade Pressure

Symptom: Wiper Blade does not contact the windshield surface evenly, leaving a large unwiped surface.

Cause: Out of shape Wiper Blade arm.

Remedy

Replace the Wiper Blade.

Line-up

As well as superior OE quality and advanced design, DENSO's Wiper Blade program for the aftermarket offers complete convenience and choice – there is a DENSO Wiper Blade for almost every car. What's more, the DENSO programme offers 2 essential Wiper Blade types, and a choice of easy fitting options including bayonet, hook or twin screw installation systems.

Design Blades Series

Truly advanced, OEM specification wiping technology – developed by DENSO - that blends outstanding wiping performance with stylish, integrated design. You can also take advantage of our Retrofit Design Blade range. Covering hundreds of key applications the range enables your customers to upgrade from conventional blades to high performance Uni Wiper Blades.

Premium and Standard available

Conventional Blades Series

A popular choice for the everyday motorist, DENSO's Conventional Wiper Blades offer all-round, long-lasting performance with a selection of different blade and installation options.

Premium and Standard available

Features by Line-up

BLADE TYPE		SUPER-CUT RUBBER EDGE	GRAPHITE COATING	AERO DYNAMIC SHAPE	COMMON FOR R/L USE
DESIGN 	PREMIUM [DDP SERIES]				Not Applicable
	STANDARD [DDS SERIES]				
CONVENTIONAL 	PREMIUM [DCP SERIES]				Not Applicable
	STANDARD [DCS SERIES]		Not Applicable	Not Applicable	

Graphite Coating

Graphite is a type of carbon particle that helps to reduce “frictional resistance” on window glass with water repellent coating.

- 1) High wiping performance without the chattering sound.
- 2) Doesn't spoil the water repellent coating on the glass so it can last longer time.

Important Factors to Determine Wiping Performance

Load Distribution of Wiper Blade

In order for the wiper blade to function properly, the entire length of the blade must be held against the surface of the glass with **EQUAL PRESSURE**.

Rubber Edge

Sharp rubber edge can make a **CLEAR WIPE**

Outstanding Merit of “DENSO Wiper Blade”

Design Type

1 Sharp Rubber Edge by “Super-cut”

DENSO original “Super-cut” makes sharp edge.

2

Compatible of high speed performance and design by “Sharpened Light Aero Plastic Cover”.

Wiping performance ➡ Increased

Conventional Type

1 Outer Yoke (Case of 6 points support)

Unsymmetrical Secondary Lever & Yoke

To keep load distribution even till the end.

2 Sharp Rubber Edge by “Super-cut”

DENSO original “Super-cut” makes sharp edge.

3

Unsymmetrical Shape Between Face and Back of Primary & Secondary Lever (Aero design)

• DENSO

• Other Brands

Similar to the shape of the wing of racing cars, DENSO Wiper Blades will not be lifted up by the pressure of the wind, even during high speed.

Comparison with Competitors

1

Load Distribution of Wiper Blade (compared at 500mm)

DENSO - Proper pressure

Other brands - Improper pressure

Due to equal pressure, streak is less likely to appear on DENSO Wiper Blades as compared to other brands.

2

Shape of Rubber Edge

Sharp Cut Edge

DENSO - Sharp Rubber Edge

Other brands - Dull Rubber Edge

Due to the sharp cut edge, DENSO will have a clear vision as compared to other brands.

3

Initial Test Result

DENSO

- Clearer visibility with less streak marks
- Smoother movement with less vibration and sound
- Easy DIY installation without additional clip

Other Brands

- Severe streak marks that impedes visibility
- Lack of durability (chattering sound and streak marks)

DENSO Wiper Blade provides a superior wiping performance, due to equal pressure and sharp rubber edge of blade.
